### Summary

As a freelance Software Engineer, I build custom web platforms and mobile apps for B2B clients. Instead of just writing code, I handle the entire project lifecycle—from planning the initial database architecture to final deployment and third-party API integration. My focus is on delivering clean, maintainable systems using Symfony, Vue, and PostgreSQL. By deeply integrating modern AI tooling (like Copilot and Cursor) into my daily workflow, I significantly speed up development cycles, leaving more room to focus on solving actual business bottlenecks. I prefer direct communication, transparent processes, and autonomous work.

### Core Tech Stack

#### Frontend

TypeScript

Vue.js

Nuxt.js

#### Backend & APIS

PHP

Symfony

PostgreSQL

REST APIS

#### Mobile

Flutter

Dart

#### Infra & Tools

Linux

Git

CI/CD

Docker

Cursor & Copilot

### Experience

#### Freelance Software Engineer / Full-Stack Developer

WebDev Ross | April 2024 – Present

Acting as a technical partner for B2B clients, delivering robust web platforms and custom integrations.

#### Selected Client Project: Mediacrowd (SaaS Platform Development)

- Built a custom booking platform from scratch (Symfony 7, Nuxt) to successfully replace their legacy system.
- Integrated Stripe for end-to-end payment workflows and connected dormakaba hardware APIs for automated digital door access.
- Developed a custom EasyAdmin dashboard to significantly streamline internal business operations and resource management.

#### Selected Client Project: Dein Schrauberplatz (Web & Infrastructure Management)

- Managed the corporate WordPress network, handling the technical rollout of new location pages and ongoing SEO optimizations.
- Built an automated Python web scraper to seamlessly synchronize the central tool database with live inventory.

### Education

#### Master of Science, Computer Science

University of Bremen | Completed: July 2026

- Focus: Software Engineering
- Thesis: Performance Analysis of modern HTTP Protocols for event-based Web Communication

#### Master of Science - Computer Science (Erasmus)

Instituto Superior Técnico (Lisbon)

Sep 2023 – Sep 2024

#### Bachelor of Science, Computer Science

University of Bremen | Completed
